MODEL 1123

MANUAL WINCH

This winch is engineered, designed and built with a precision interlocking steel frame for high rigidity and precise alignment. Winch comes with a semi-enclosed, self-lubricating worm gear with a load rating of 1000 lbs. Grooved drum for accurate winding, with a constant pressure roller, prevents the cable from climbing drum ends. Supported by large diameter ball bearings and with through the drum type rope anchoring. Braking is provided by double, self-locking worm gearing with a passive uni-directional brake.

Winch is supplied with cover and is directly mounted to the wall. Each winch shall be equipped with a removable handle with a free turning sleeve that provides an easy, no friction grip.

ACCESSORIES

Optional wood pad for mounting winch to walls not suitable for direct mounting sold separately.

PORTABLE ELECTRIC WINCH WINDER

Compatible portable electric winch winder is Performance Sports Systems model 1119. See accessories section in Performance Sports Systems specification manual for more information.
